Text Frage, geantwortet 252x, unbeantwortet 4x

- They are doing a great job so far. Just keep calm and do whatever you can ;)
- fight btc maximalists on wikipedia
- Just keep ging. You are doing a great job?
- Don't focus on m2m only. Keep cash payment in mind.
- Take time off for fresh look.
- Keep on engineering, learning and growing
- Hopefully the IF will be able to market itself as a green coin in the future
- Great
- keep doing what u are doing
- Stay focused
- more focus on developing hardware for iot
- Focus on the Energy and Mobility sector
- Keep up the awesome work!
- Nothing
- Keep uup the good work
- go on
- (3x) -
- Get some liquid democracy into the foundations structure

- They're doing great
- (4x) None
- the progress bars are not detailed enough
- I think, a reference implementation which runs on a raspberry pie would expand the network in a great manner. And please don't fight each other, competitors or trolls. Keep up the great work! :)
- Password less authentication
- Regular AMA
- Make your vision come true. Convince all from the benefits of IOTA. Make it the new standard. Be professional. And cool. And best in class.
- Make the world a better place to be
- (2x) Better PR
- Remove COO
- I suggest more offices around the world
- Change the world!!!
- Simplify to start IOTA HTTPS node for Trinity Wallet
- Testnet
- A
- No Speculation, professional appearance
- No announcement of announcement :) release something when its finished and let hurry by the community
- There is a need for a iota/fiat paring. A better way to buy iota directly with low fess is wath I think is needed now
- (21x) No
- The foundation is on track, continue your way and don't focus on price
- (6x) no
- a monthly AMA would be nice :)
- Dom needs a new photo taken.
- Don't fck it up due to hurry.
- Business oriented individuals and teams would benefit by having a better in-depth understanding and communication of business use cases as opposed to technical articles. More business value and business use case communication. E.g. qubic updates.
- I think ita great they have hired a community liason- will help alot with open communication.
- (4x) Nope
- Keep the pace. No hurry. Look 4 adoption
- keep up the focus on practical application.
- I'm.confident in their direction and vision. Get in with the big guys but don't forget the little ones too.
- Keep doing you
- Stay stealth as long as possible
- (5x) Keep up the good work
- Yes, hire Roman Semko full time!
- Get with Tesla and Amazon
- Grow a little bit in your mind. You are responsible for this invention go forward
- Act like professionals 100% of the time
- Focus on just a few important goals instead of starting hundred projects a d finishing none of it.

- This incredible team has achieved so much in a short period of time and proven that it is capable to change the world.
- better marketing
- Keep it up... your time is coming.
- Keep doin what you are doing.
- Keep doing what you're doing!
- Stop trying to reinvent everything.
- I think it's time to hire a PR firm and do some advertising. Mostly, I think for the specific goal to help people understand IOTA, the Tangle, Qubic, Clusters, etc. Even smart people have a hard time understanding the concepts.
- Less "Soon" releases, just let us know when you have the product.
- No teasing of release dates which gets instantly delayed every time (like purposed datamarketploace blog post release a few weeks ago for the "coming days" and 2 months later there is still nothing at all
- Start marketing the product.
- Stop looking down on those of us who invest, but aren't in the field to contribute. Our money is still valuable and so are we. Founders don't "owe" us anything, but mutual respect would be nice.
- Build a bigger US presence
- Act more professionally (has already improved so far)
- I don t speak in english, sorry
- Make things less about your individual selves. Everyone outside of the community has an impression that iota founders are assholes and it's true to an extent. Repair your image. Stop cursing and being juvenile. Stop poking fun at people
- Don't neglect any of the important eight parts of the B-I Triangle from Robert Kiyosaki.
- Non at this moment
- I think they are doing their best already :)
- more support for the core community developers
- Nbpow 1 priority
- Do not prosyete your lack of accountability to investors. Whether this feeling is institutionalized or not, well founded or otherwise, it does nothing to further the project.
- Keep up the great work, more community engagement, more emphasis on education for the lay person on potential use cases
- Rock on keep on doing what you are doing
- n/a
- Keep on going.
- You know what you do and you're quite good in not letting anybody influence you in a negative way/away from your vision. Stay that way.
- 😊
- you have difficult to attract telnet people
- Release proof of ternary advantage.
- Stop trying to be political
- Keep an eye one the community
- Make your product worth using it
- A litte more Marketing
- Be sustainable
- Moon☒

- (3x).
- (2x) keep up the good work
- Handle PR better and act professional with those who don't deserve it (ie: don't swing around your dick so much that you step on it).
- Keep doing what you do
- Everything could be tangled
- Approach asia and usa more
- Good things need their time
- Es wäre toll wenn man ein Video hätte um seinen Chef (in einem Unternehmen aus der Industrie) von IOTA zu überzeugen und die Möglichkeiten schnell und einfach zeigen könnte um sein Interesse zu wecken.
- Keep on
- Keep your Partner
- More professional appereance in public (twitter etc.)
- (2x) N/A
- Take your Time!
- get your shits done
- I want to expect poc of tangle
- Stay strong
- (2x) Soon
- It's a scam. They can't get rid of the (centralised) coordinator because the protocol is fundamentally flawed. IOT devices doing PoW makes zero sense; if JINN makes PoW efficient, attackers would just use JINN as well.
- Keep the vision and adjust as needed
- caution in front of the banks
- Wow
- The IF need uber as a partner for real world adoption
- ?
- Ignore the junk on twitter / reddit / internet.
- - none -
- Release the fucking Q
- Start real life usage
- Go tiger
- hire me as a chef
- Spread IOTA to the world
- there sould be a community xmas party :D
- Keep up the awesome work.
- Adoption is king, it will make or break IOTA. Partnerships and business developers are super important. Things like the COO make people wonder if IOTA can be succesful at all. Some centralization will be fine, as long as you can deliver the plans!
- If you want to become global you have to do your marketing well. They should work on marketing more if possible.
- Change the world
- Wen moon
- Not right now

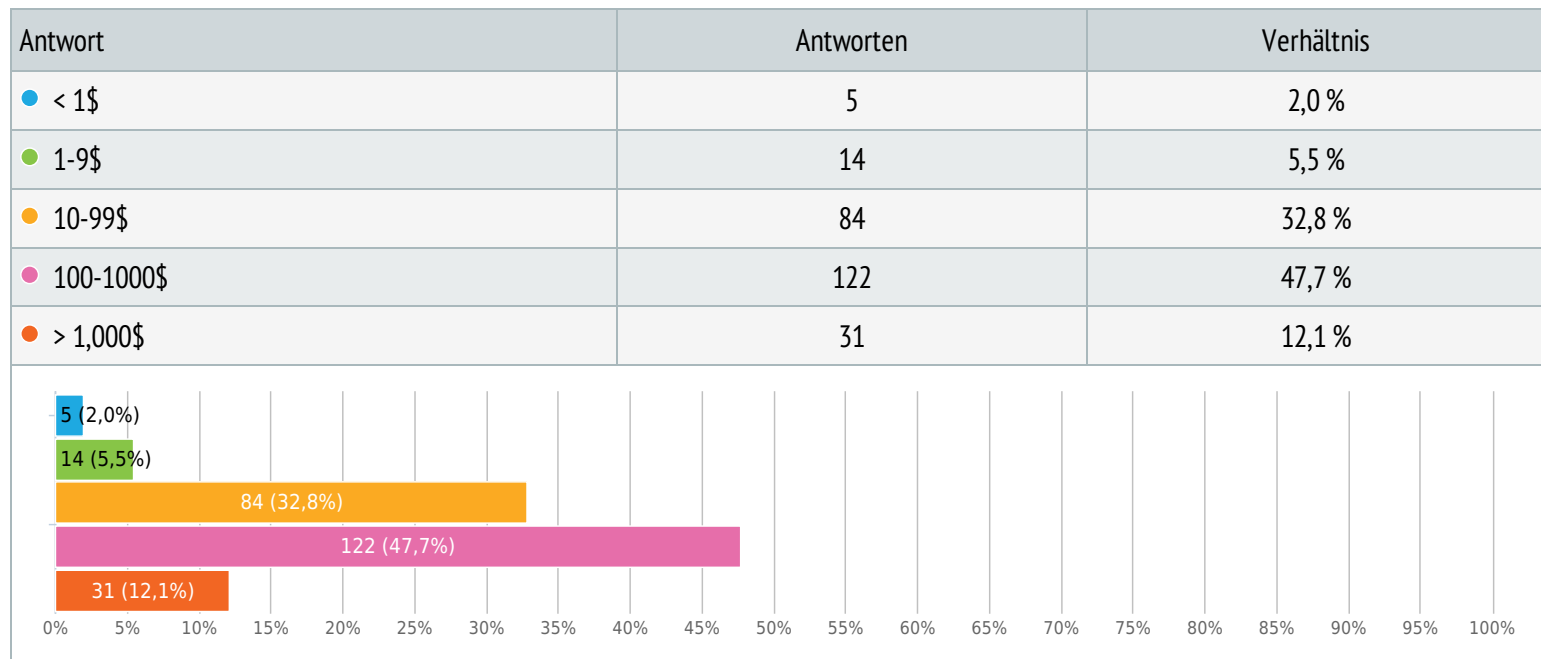

- Keep on the great work! Love following the project and cannot wait to see what is to come!
- More and better documentation
- No suggestions
- Emphasize real-world applications. Get into more partnerships with companies that have real-world applications and could utilize IOTA for the same. Don't pursue pointless partnerships with other crypto and BS companies (unless really beneficial).
- beer
- Be more transparent
- Keep up the close relationship with the community.
- More updates about what's going on with the big partners as Bosch, VW, BMW
- thanks
- Promote IOTA and give thorough instructions of how to handle IOTA well
- keep strong :-)
- Get rid of the childish ego issues like Dom needs to swear. Professional and serious presentation is important.
- not yet
- NESSUNO
- ko
- Stay Strong
- Better communication
- moon
- Apple Inc. in 1977
- Need more adoption. Need more iota info spreading. For project to be successful.. project needs users!! If project is brilliant but has no users, it won't succeed!
- keep going to make a dent in the universe.
- More often communication
- Never back down. Never surrender.
- Stay cool and take your time...don't get confused
- David should do more interviews to increase the awareness of IOTA. The few that are in YouTube are amazing
- Nope, all is good. Good things need time
- IOTA wallet as Firefox plugin to pay media content
- Less Drama more Work
- roadmap for coordination, show hodlers more love
- I'm worried about PR/marketing. Some situations (DCI, CfB/Dom disagreement) could be handled A LOT more professionally. CfB and David should be more careful about what and how they say publicly. Sometimes leaders needlessly contribute to the FUD.
- Founders should think more about their appearance in public and social media.
- Make Q a great thing
- Please, focus on the network infrastructure to be reliable and fast
- Keep doing what you're doing
- Better media communication
- nope
- Continue their work and taking pleasure in doing this :)

- The chat leak was really bad
- Keep up the great progress.
- Keep up the great work
- Focus on real life usecases
- With great power comes great responsibility.
- /
- great work
- Keep up the good work! Ok
- Consider a continuous snapshot mechanism that removes transactions as others are added over time.
- keep up the hard work
- Keep up the good work!
- Do some for the ecosystem of the nature
- no!
- More Marketing
- Make it easier to set up a node -to the extent that my grandma could.
- Na
- X
- Work
- Innovate
- more PR
- Realize tangle mainnet version, show us top transactions number
- brilliant
- Wen Q
- Always try to fix the needs of people.
- Don't dismiss your vision! :)
- Good Job!
- Sell this thing! Ppl need to know.
- Please make me rich and don't create a sci-fi nightmare ;-)
- Not this moment
- xvbxcv
- Make sure everything is in English, most the stuff I find is in german.
- Best ever
- Be creative
- Stay strong and go on! You are doing a really good job there.
- Doing official meetups all around the world would greatly help in terms of mass adoption.
- make it great !
- Ggf
- stop fight like kids and be serious about the project.
- Not really... your guys commitment and continued growth is remarkable
- MARKETING!

- :)
- Keep supporting new IOTA-based projects financially and attend IoT conferences around the world, especially if it's related to blockchain.
- Launch Qubic
- Nil
